

Thanks for purchasing our products!

This tuning guide is intended to be a reference to use as a first set up with OneSails. Sailors are very much encouraged to try different settings in order to find that extra speed that we all are looking for.

NOTE: tuning guide optimized for SIDEWINDER masts.

TWS (KN)	Shrouds Use tension gauge Loos&Co PT1-M	Turnbuckle (sta-Master) turns respect to base
0-7	18	-1
8-12	20 in the scale PT1	0
13-18	22	+1
18-22	24	+2.5

Spreaders		Rake	Mast Butt
LENGTH (mast to shroud)	DEFLECTION (tip to tip)	Halyard from the top to the edge of the stern	DBR1 Persson (from front of daggerboard box)
420 mm	770 mm	6.570 mm	390 mm

Mast Pre-bend

Measure with Mainsail halyard as a reference. Pay attention that the halyard is attached to the front of the mast in the tack. Maximum pre-bend 35 mm
